

## PRODUCTION

### Production

- Tablet Section
- Liquid Section
- Air Handling Unit
- Capsule Section
- Ointment Section

#### Tablet Section

Rapid Mass Granulator : Dry and wet mixing of raw material is being done in this section.

Fluid Bed Dryer : This machine is meant for drying of tablet granules.

Coating Machine : To improve the compliance of tablets, coating is being done here.

Blister Machine : Finally from Tablet Compression Machine, tablet goes to Blister Packing.

#### Liquid Section

Oral Liquid Preparation Section : These are high speed stirrer tanks for Oral Liquid Preparation.

Liquid Filling Section : This is automatic liquid filling machine. It fills up accurate quantity of liquid into bottles.

Automatic Liquid Labelling and Packaging Machine : This is Liquid Labelling and Packaging Section.

#### Air Handling Unit

It regulates fresh air. it does not allow entry of particles of more than 5 micron inside the manufacturing area. to prevent air pollution it sends pure air outside too.
